

Thinking Deeply

The Common Core emphasizes critical thinking. It requires students to analyze more, discuss more, evaluate more, justify more and explain their thinking & understanding deeply, especially in writing . Take-Away: Really thinking deeply is hard. Let it BE hard, help them talk it out.

Integrating Learning
The Common Core emphasizes learning across disciplines (reading with math & social studies standards combined into one task). Students spend more time working together with different settings, structures & tools. Take-Away: Problems & solutions happen everyday in the real world.

Showing How Thry Know
The Common Core emphasizes proof & evidence. Long gone are the days of worksheets, fact memorizations and skill & drill. Students are not taught this way and they are not assessed this way. Takeaway: The new tests will require students to explain how they know.

## Supporting The Common Core at Home

- Ask \*why\* when children tell you they want something or want to do or not do something. Use the word \*because \* after "No" or "Not tonight..." @ Give reasons—you to them and them to you.
  - ©Encourage questions & explore answers (especially questions whose answers are not yes or no.)
- ©Explain & discuss issues or problems in your house, neighborhood, & community. Brainstorm solutions. © Compare how things are alike and different-videos, movies, food. Dook for patterns Describe & categorize stuff. Tell your children what you value & why. Dencourage & celebrate opinions.
